About Me

Dedicated and passionate computer science engineering student, interested in machine learning, web scraping and web development. I like to learn about new technologies. I want to be a part of an organization where I can get a chance to use my knowledge and technical skills to contribute in the progress of the organization as well as myself.

PROJECTS -

A Responsive Online Food Ordering Website.

- In this project, I made a food ordering website that wants to deliver food to someone.
- I made this website fully responsive.
- The technology used in this project are- HTML, CSS, JavaScript.

Dance Website

- I made a user friendly dance website.
- Also made a contact form in this website using **PUG**.
- The technology used in this project are- HTML, CSS, JavaScript and **PUG for back-end**.

Web Scraper

- In this project, I made a web scraper that read the data from the excel sheet and scrape the important information then paste that information in another excel sheet. I also automate it.
- The technology and libraries I used in this project are - Python, BeautifulSoup, Requests-html, pandas and xlswriter.

Experience

- Worked as a **Software developer** at **Impact media** for three months.
- I scraped so many websites, articles etc.
- I am familiar with BeautifulSoup, requests-html, selenium, scrapy, helium, pandas, numpy, xlswriter and many more.
- Also manage the front end of the website.
